Following receipt of the ElectricAid funds, we raised further funds from other donors to undertake further urgent works at the school. In total we were therefore able to provide: 2 new classrooms (funded by ElectricAid), the renovation of 5 existing unfinished classrooms, a block of latrines, and 2 rainwater catchment tanks (funded by other donors).

### Financial Report

Item	Budget €	Actual €
2 new classrooms	9,891	9,891
<b>Total</b>	<b>9,891</b>	<b>9,891</b>

### Anticipated Outcomes of This Project:

- We estimate that in the first year alone, 100 children will benefit from a greatly improved learning environment. With future intakes of children over the life of the buildings thousands of children will benefit.
- The capacity of primary education at the school has been significantly increased enabling more children to receive an education in less crowded conditions.
- Improved facilities will increase academic performance. Many will be given improved life opportunities, including increasing the number of primary school children entering secondary education.

### Thanks and Appreciation

The community have requested we pass on their very grateful thanks and appreciation for what ElectricAid has given them. A copy of their letter of appreciation is attached to this report.

Thank you for your support for this project.

Yours sincerely,

Nick Touzel, Treasurer, *Good News!* Trust
